

## RESIDENTIAL/COMMERCIAL ELEVATORS:

MOBILITY provides elevators that are affordable and can be customized to fit your specific needs. Access elevators are available in either cable driven or hydraulic systems with an optional battery back-up system. They come in a variety of styles and can be easily installed into residential or commercial buildings. Our state of the art products add value to the site and allow you to travel up to five flights.

One of our unique products is a residential vanishing elevator that travels between two floors. It has aesthetic appeal with its plexiglass sides and requires minimal construction. This elevator is dependable, affordably priced, and is often considered when there is limited space.

You can design a luxury elevator with natural wood, mirrors, inlay flooring, carpeting, and special lighting. An emergency brake device, a door interlock system, and a telephone, ensures safety and reliability. We work with architects, designers and contractors to meet the needs for each project according to the ADA, the ANSI A17.1 and the Barrier-Free codes. A quiet, smooth and easy to operate elevator may be the answer to your accessibility project.

## MOBILITY ELEVATOR & LIFT CO.

Serving the Tri-State Area, is an authorized dealer for the following top lift manufacturers in the industry:

# We are TOP in providing Elevator & Lift Solutions

The Americans with Disabilities Act (ADA) prohibits discrimination, and is intended to establish independence, equal rights, and opportunities for persons with disabilities. *MOBILITY ELEVATOR & LIFT CO.* offers definite solutions by removing architectural barriers with access elevators, wheelchair lifts, and stairway lifts.

## STAIRWAY LIFTS:

The residential stairway lift is designed for straight or curved stairways, single or multiple flights. The comfortable seats can swivel, remain stationary, and even fold up when not in use. The rider usually sits but has an option to stand up with certain models. For those who previously found going up and down stairs difficult, these lifts are the solution. (see cover)

**SALES SERVICE & RENTALS**

## VANISHING ELEVATORS

We have been breaking the barriers imposed by stairways to solve access problems of the disabled. Public buildings including restaurants, medical offices, retail stores, religious institutions, schools, theaters, hotels, and court houses are overcoming barriers imposed by stairs with elevators and lifts.

**CUSTOM LIFTS ARE OUR SPECIALTY**

## VERTICAL WHEELCHAIR LIFTS & PNEUMATIC ELEVATORS

The vertical wheelchair lift overcomes physical barriers for persons with disabilities. They can be installed for permanent and portable applications. These lifts are smooth riding, quiet and space efficient. In the event of a power failure there is an optional battery back up or emergency lowering system.

The vertical lifts have a maximum lifting height of 25 feet and are often used to eliminate lengthy ramps. They are installed for both indoor or outdoor, home or public use. Product features and options include roomy non-skid surface platforms, easy entry/exit, gates, plexiglass enclosures, and multiple safety devices.

**24 HOUR SERVICE**

## INCLINED WHEELCHAIR LIFTS:

Our inclined lifts can have an automatic fold-up platform and battery back up system. A person rides the lift in a wheelchair or on an optional folding seat. These lifts are designed to go up or down straight run stairways or around corners between two or more levels to make most buildings accessible.

Inclined/vertical wheelchair lifts are installed to meet commercial requirements by complying with the laws: ADA, Barrier-Free Subcode, and ANSI A17.1 codes. TAX CREDITS UP TO 50% AND/OR DEDUCTIONS UP TO \$15,000 ARE AVAILABLE.

*There is an increasing demand for public areas to become more accessible. Our lifts are customized to fit your specifications and the surroundings. MOBILITY's experience in the industry and reputation for quality products has not only earned high marks with commercial users, but with private and rehabilitative organizations as well. Whether your equipment needs are to meet accessibility codes for commercial buildings or for home use, MOBILITY has the appropriate products.*
